

# MUHAMMAD ABID AL KHAWARIZMI

+6281337661419 | abidkhwari@zmi@gmail.com | <https://abidrizmi.netlify.app> |  
<https://www.linkedin.com/in/abidrizmi/>  
Kec. Taman Sari, Ampenan, Mataram, Lombok

A fresh graduate in Computer Science from Universitas Bumigora Mataram with a strong interest in software and web development. Experienced in building web-based projects and continuously improving technical skills through hands-on practice and academic work. Highly motivated, adaptable, and committed to continuous learning, with the ability to contribute effectively in both academic and professional environments.

## Project

---

|                                                                        |          |
|------------------------------------------------------------------------|----------|
| <b>ERD for Digital Platform as a distributor of Video Game (STEAM)</b> | Jul 2022 |
|------------------------------------------------------------------------|----------|

- By using MySQL, SQL & Power Designer for the implementation.

|                                        |          |
|----------------------------------------|----------|
| <b>Automatic Door with Arduino Uno</b> | Jan 2023 |
|----------------------------------------|----------|

- By using Arduino Uno, Ultrasonic Sensor and Motor Servo that implemented with C++.

|                                      |          |
|--------------------------------------|----------|
| <b>Digital Library (Application)</b> | Jan 2023 |
|--------------------------------------|----------|

- A Digital Library using Java & NetBeans that implemented with OOP.

|                                             |          |
|---------------------------------------------|----------|
| <b>BabyBoost Website (Capstone Project)</b> | Des 2023 |
|---------------------------------------------|----------|

- A child nutrition monitoring website that is implemented by using JavaScript, Bootstrap (CSS), and Express.js.
- GitHub Repo: <https://github.com/BabyBoost>

|                              |          |
|------------------------------|----------|
| <b>Desa Tagawiti Website</b> | Des 2024 |
|------------------------------|----------|

- An information of tagawiti village website that is implemented by using JavaScript, Bootstrap (CSS), and Express.js.
- GitHub Repo: <https://github.com/warizmy/Tagawiti-FE>

## Education

---

|                             |             |
|-----------------------------|-------------|
| <b>SMA Negeri 2 Mataram</b> | 2018 – 2021 |
|-----------------------------|-------------|

Mathematics and Natural Sciences

- Final Score: 87.49

|                             |                      |
|-----------------------------|----------------------|
| <b>Universitas Bumigora</b> | Sept 2021 – Aug 2025 |
|-----------------------------|----------------------|

Bachelor's degree in computer science, Concentration of Artificial Intelligence

- GPA: 3.80/4.00
- Actively participates in more than 5 campus events, such as webinars and skills training workshops

## Experience

---

|                            |                     |
|----------------------------|---------------------|
| <b>Bootcamp at CAMP404</b> | Des 2022 – Jan 2023 |
|----------------------------|---------------------|

- Participants/Students who take part in Bootcamp about Fundamental of Web Development. Mostly, I learn about PHP and the framework Laravel.

|                                                                                     |                |
|-------------------------------------------------------------------------------------|----------------|
| <b>Front-End Web &amp; Back-End Web Development Student at SIB Dicoding Cycle 5</b> | Aug – Des 2023 |
|-------------------------------------------------------------------------------------|----------------|

- SIB Dicoding Cycle 5 is one of the programs of Kampus Merdeka, namely MSIB with a focus on Independent Studie.

- As a Front-End Web and Back-End Web student, I learned about Git, Front-End (HTML, CSS, JavaScript) Back-End (Node Js, Express Js, and Amazon Web Services), Testing (Uni test, Integration test, and System Testing), also learn how to deploy a Website and maintain it. Making a Final Project (Capstone Project) as a Group, the final project is a website called BabyBoost.

#### Intern at LKP ITEC Mataram

Jul - Aug 2024

- Reviewing and summarizing research articles related to forecasting in drug, medicine, and supply.
- Assisting in testing advanced forecasting algorithms and methods for accuracy and performance
- Contributing to a hybrid forecasting approach utilizing a pharma sales dataset that categorized various types of drugs.

#### Assistant Data Researcher/Analyst at Populix

Jul – Des 2025

- Managed and queried research datasets using PostgreSQL and DuckDB to support data processing and analysis workflows.
- Cleaned, preprocessed, and structured raw data from multiple sources, including news and textual datasets, using Python.
- Performed data validation, normalization, and consistency checks to ensure high-quality and reliable research data.
- Transformed raw data into analysis-ready formats for reporting and further research use.
- Maintained clear documentation of data processing pipelines to ensure reproducibility and transparency.

## Event Experience

---

#### UI/UX Workshop UBG

Oct 2022

- How to develop a design by learning UI/UX using FIGMA.

#### One Day Informatics

Des 2022

- Developing Solution for Local Community with role of Data Science in building solutions for local problems.
- Develop a product that has an impact on local problems by using Flutter.

## Achievements

---

- I achieved the Top Talent certification course at CAMP404 and successfully completed all requirements and criteria through examination with passing grade A (Jan 2023).
- Achieved the Best Capstone Project at SIB Dicoding Cycle 5 (Des, 2023).

## Courses

---

- Completed *Web Programming Fundamentals* at CAMP404 (Jan 2023).
- Complete an SIB Dicoding Cycle 5 that organized by **Kampus Merdeka** (Des 2023).

## Skills

---

- **Hard Skills:**
  1. **Programming Languages:** JavaScript, PHP, Python
  2. **Technologies:** Git, ReactJS, Bootstrap 5, Express.js, Laravel, PostgreSQL, MySQL
  3. **IT Constructs:** DBMS, Data Structure & Algorithms, OOP, Operating System
- **Soft Skills:** Leadership, Communication, Teamwork, Adaptability, Continuous Learning, Critical Thinking, Creativity, Attention to Detail, Time Management, Professionalism.
